

*Citrus Industry Magazine- UF/IFAS SWFREC Citrus Mechanical Harvesting Program
“What’s Shakin” column*

April 2012

Nine new articles have been added on the Citrus Mechanical Harvesting & Abscission Program website (<http://citrusMH.ifas.ufl.edu> , navigate to the Extension-Publication page. Search by author, title or keywords). Four of these articles discuss research with the selected abscission agent, CMNP. These publications provide the reader on three aspects of abscission usage: using abscission with Hamlin and Valencia, whether abscission affects peel integrity and the timing of application and harvesting. The publication library now has over 375 publications available for your viewing or printing.

If you were unable to attend the International Symposium on Mechanical Harvesting and Handling Systems of Fruits and Nuts earlier in April we will have the abstracts available on our website.
