

Citrus Industry Magazine- UF/IFAS SWFREC Citrus Mechanical Harvesting Program "What's Shakin" column

March 2008

Do you know about abscission or the new technologies being developed for yield estimation or yield monitoring with citrus mechanical harvesters and autonomous guidance? If you are interested in seeing and learning more about these and other new technologies being developed for mechanical harvesters, plan on attending the 2008 Spring Citrus Mechanical Harvesting Field Day on April 22. It will be held at the Southwest Florida Research and Education Center in Immokalee. There will be presentations as well as demonstrations. Lunch will be provided. To learn more, call Barbara at (239) 658-3461. Please RSVP if you plan to attend.
