

***Citrus Industry Magazine- UF/IFAS SWFREC Citrus Mechanical Harvesting Program  
“What’s Shakin” column***

June 2009

Dr. Reza Ehsani, an agriculture engineer at CREC, is a member of the IFAS Citrus Mechanical Harvesting & Abscission Program. His team is researching mass harvesting machine improvements which includes yield monitoring, improvements of the canopy shaking mechanisms, variable rate shaking of trees, and a trash detection system using machine vision.

His research has led to numerous publications. Dr. Ehsani’s publications and other new research articles can be downloaded at the mechanical harvesting website <http://citrusMH.ifas.ufl.edu>. Please go to the website and look under our Publications Database.
