

*Citrus Industry Magazine- UF/IFAS SWFREC Citrus Mechanical Harvesting Program
“What’s Shakin” column*

May 2010

The “Abscission White Paper” is available for reading at the Citrus Mechanical Harvesting & Abscission Program website (<http://citrusMH.ifas.ufl.edu>). The paper was written as part of the CMNP (abscission) submission package to the USEPA. The paper provides the reader with an in depth description of citrus mechanical harvesting and how abscission will affect harvesting efficiency. The Citrus MH website has a library of over 340 publications available for your viewing or printing. Recently added to the library were 11 new publications on machine enhancements and tree health. Also available at the website are all of the presentations that were made at our April 21st field day and workshop at the SWFREC in Immokalee entitled “Overcoming Obstacles and Making the Transition.”
